# Introduction

**Bright Hair Studio** faces key challenges in queue management that directly impact customer experience and revenue. This project proposes an online queue booking system designed to **reduce in-store congestion, optimize stylist scheduling, and unlock new revenue opportunities** through digital channels, with an estimated business value of over 6,000,000 THB per year

# Customer Journey Map

## Scenario

Gun is a guy who wants to book a haircut appointment online in advance to avoid waiting in line and to choose their preferred barber and time

## Goal & Expectations

- Easy and fast booking process
- Real-time availability of time slots
- No long waiting time at the shop

### Discover

- ① Search shop's website and Enter Login Info

#### Touchpoints

# Service Blueprint

# System Request

1

## **Reduce Congestion**

Minimize in-store waiting area crowding by shifting bookings to digital channels.

2

## **Customer Satisfaction**

Improve booking experience with real-time availability, reminders, and easy cancellation.

3

## **Three User Groups**

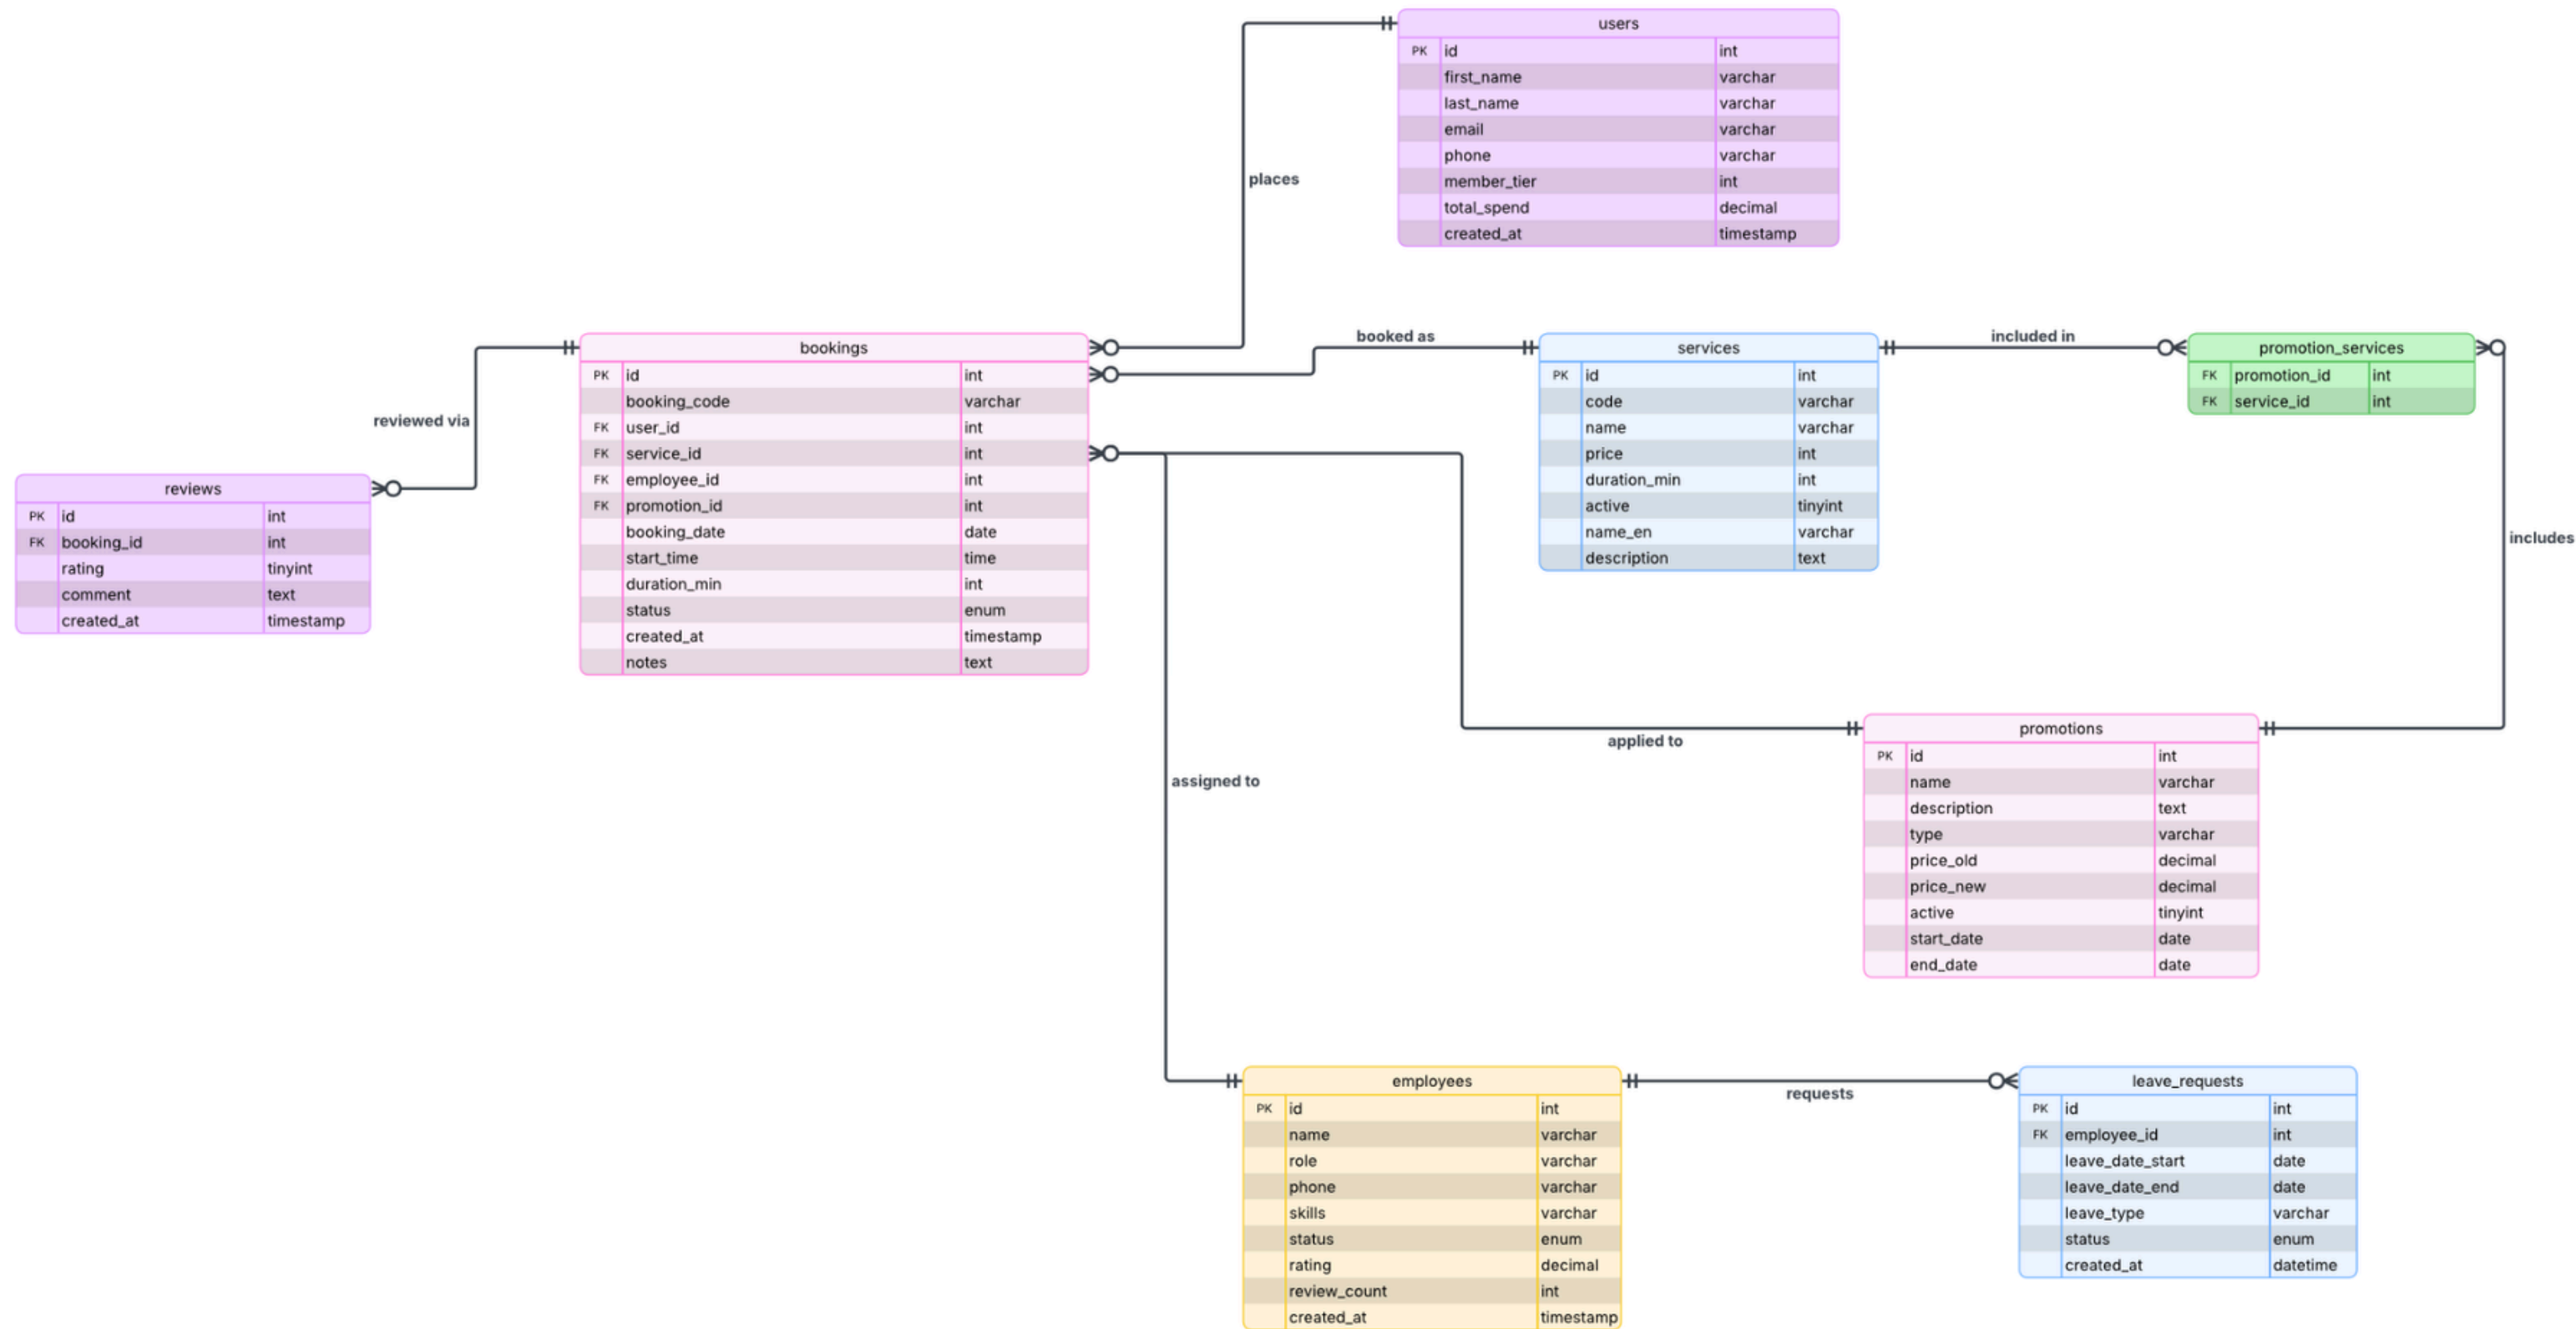

The system serves three distinct roles: Customers, Hair Stylists, and Admin.

4

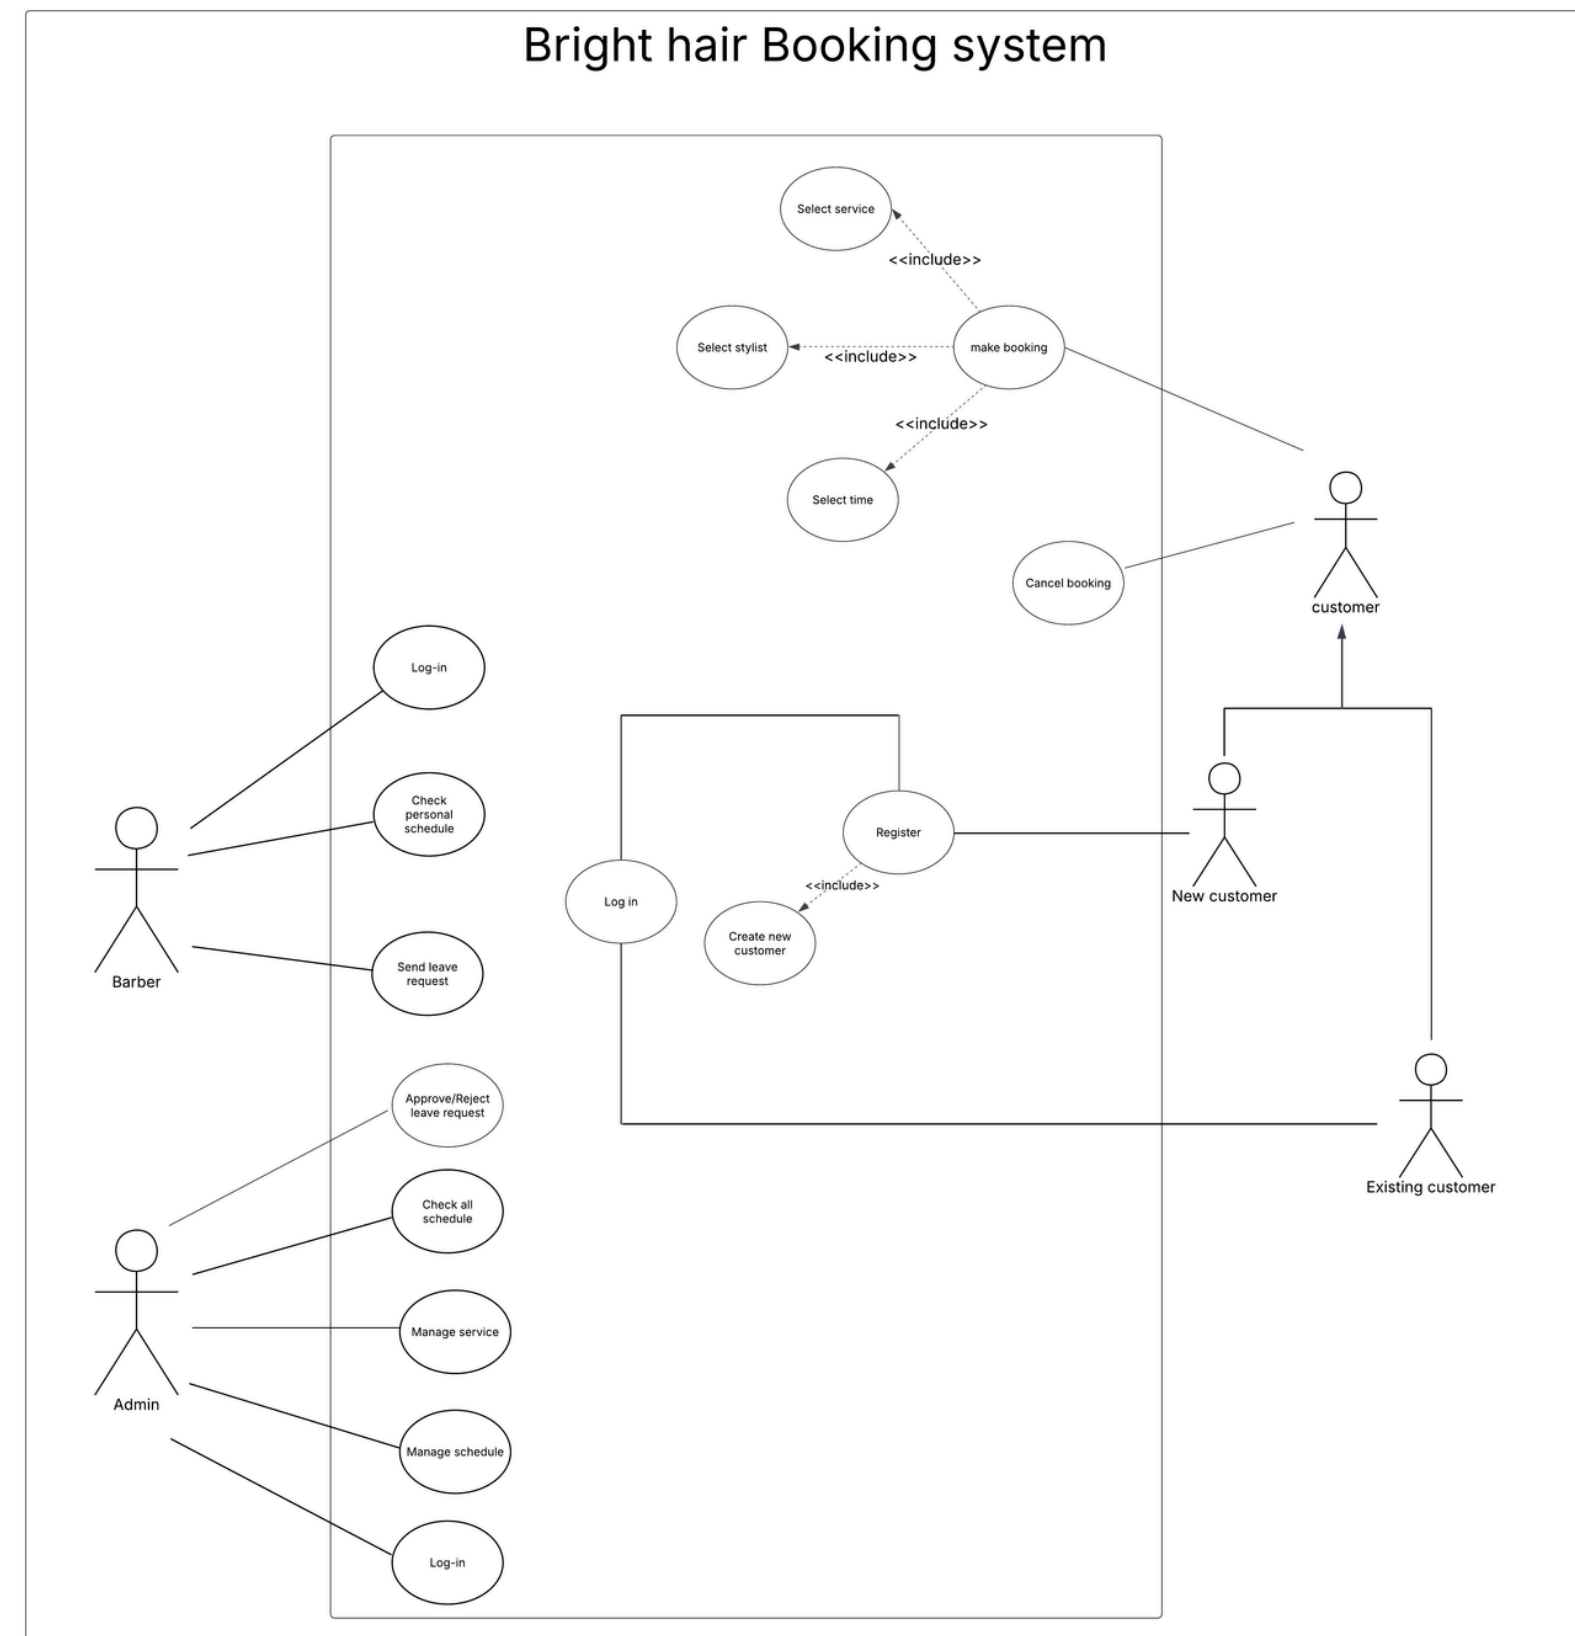

## **Revenue Growth**

Expected to generate over 6M baht/year through optimized scheduling and upselling services.
